“DIRECTIVE 2012/19/EC on waste electrical and electronic equipment”

WEEE - Waste Electrical and Electronic Equipment

Declaration by Xylem Flow Control Ltd.

We hereby confirm that Xylem Flow Control Ltd. is aware of the above directive and we make the following statements to whom it may concern:

It is the company's view that their Alcon product range falls outside the scope of WEEE regulations as it is covered by fixed installation.

The commission FAQ describes a fixed installation as “a combination of several equipment, systems, finished products and/or components assembled and/or erected by an assembler/installer at a given place to operate together in an expected environment to perform a specific task but not intended to be placed on the market as a single functional or commercial unit”.

Signed:

Director of Engineering
